CALCULATED direct chart or timing data

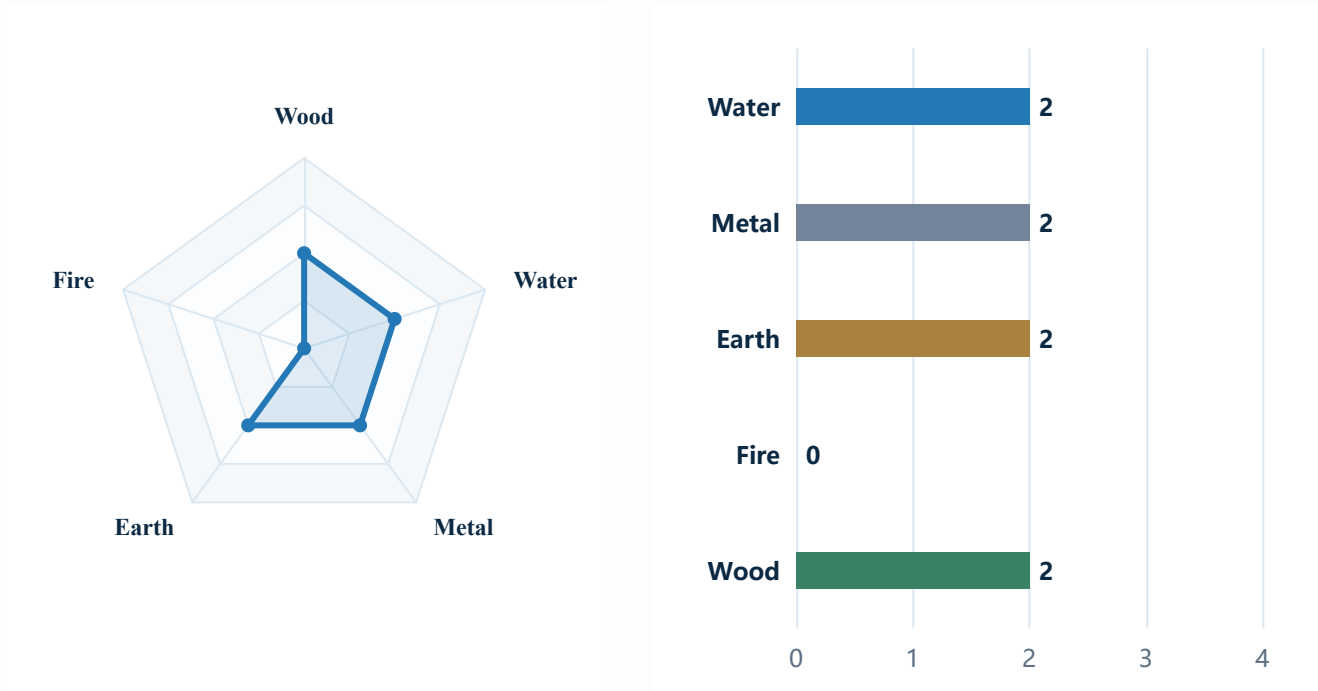

SUPPORTED structural interpretation

CONTEXTUAL compare with lived circumstances

FIVE ELEMENT ENERGY

A broad 4-element profile

The chart counts visible stems and branches only. Zero does not mean an element is absent from life; it means that function is not visibly emphasized in the natal pillars used here.

Wood / Companion
Identity, peers, continuity

Earth / Wealth
Resources, exchange, stewardship

Water / Resource
Learning, support, replenishment

Fire / Output
Expression, craft, production

Metal / Officer
Direction, standards, authority

RELATIONAL ENERGIES

How the chart's forces relate to the Day Master

This profile combines visible stems with weighted hidden stems. It describes structural emphasis, not a fixed percentage of personality.

偏印	Indirect Resource		41%	Pattern recognition and intuition Visible 2.3 · Hidden 0.7
七杀	Seven Killings		19%	Pressure, courage, and decisive action Visible 0.0 · Hidden 1.4
偏财	Indirect Wealth		18%	Opportunity and flexible exchange Visible 0.0 · Hidden 1.3
比肩	Friend		12%	Identity and self-direction Visible 0.8 · Hidden 0.0
正官	Direct Officer		8%	Standards, duty, and legitimate authority Visible 0.0 · Hidden 0.6
伤官	Hurting Officer		2%	Originality and challenge Visible 0.0 · Hidden 0.2
劫财	Rob Wealth		0%	Competition, alliances, and shared resources Visible 0.0 · Hidden 0.0
食神	Eating God		0%	Gentle expression and craft Visible 0.0 · Hidden 0.0
正财	Direct Wealth		0%	Steady resources and stewardship Visible 0.0 · Hidden 0.0
正印	Direct Resource		0%	Learning, support, and restoration Visible 0.0 · Hidden 0.0

Reading the scale

Percentages use largest-remainder rounding and total exactly 100%. Visible counts come from non-Day stems; hidden scores use weighted branch roots. This is a technical distribution index for the natal chart.

神煞 / SHEN SHA

Markers that add nuance, not fixed outcomes

Each marker is calculated from the natal stems and branches. It is interpreted as supporting context and never overrides the Day Master, Five Elements, or Ten-God structure.

MARKER	LOCATION	DERIVED FROM	PRACTICAL INTERPRETATION
华盖 Canopy Star	2 PLACEMENTS YEAR 戌 · DAY 戌	Day Pillar + Year Pillar	Supports specialist depth, solitude, aesthetics, and the ability to work beyond conventional opinion. Repetition increases emphasis across life contexts.
驿马 Travel Horse	2 PLACEMENTS MONTH 申 · HOUR 申	Day Pillar + Year Pillar	Adds momentum through movement, changing environments, travel, or roles that resist stagnation. Repetition increases emphasis across life contexts.

How to read this page

A marker describes a recurring symbolic tendency. Repetition can strengthen emphasis, but no single Shen Sha guarantees an event, relationship, or outcome.

01

Structure

Four Pillars and Day Master

CORE INTERPRETATION

The calculated Four Pillars are Year 甲戌; Month 壬申; Day 甲戌; Hour 壬申. The Day Master is the Day Stem 甲, a Yang Wood stem.

Chart basis

Day Master: 甲, a Wood Heavenly Stem. Day Pillar and Day Master are kept distinct.

The two-character Day Pillar is 甲戌; it must not be substituted for the one-character Day Master. In standard BaZi, each position provides a different frame: Year represents ancestry, early environment, and the wider social field; Month represents seasonal command, work structure, and the chart climate; Day represents the Day Master and Spouse Palace; Hour represents later-stage projects, output, and descendants. These are traditional chart positions, not verified biographical facts.

The Month Branch is given priority when evaluating seasonal qi, while the Day Stem remains the reference point for Ten-God relationships. The natal chart contains exact whole-pillar repeats: 甲戌 across year and day; 壬申 across month and hour. These are calculated Fu Yin contacts and are analyzed in Section 6.

At this foundation stage, no claim is made about personality or future events. The direct facts are the four pillar positions, the 甲 Day Master, their Yin-Yang polarity, and their Five-Element and Ten-God mappings.

Calculated fact

- Directly derived from the supplied Four Pillars.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

02

Structure

Seasonal Qi and Day Master Strength

CORE INTERPRETATION

Seasonal qi is read from the Month Branch 申, whose base element is Metal. This report does not infer a lunar month number from the Gregorian birth month.

Chart basis

Month Branch: 申; strength is read through season, roots, support, drains, and controls.

For the 甲 Wood Day Master, Metal is Officer and controls the Day Master, Water is Resource and produces it, Fire is Output and is produced by it, and Earth is Wealth and is controlled by it. The rooting check finds same-element roots in: none. None of the supplied branches contains a canonical hidden Wood stem, so the Day Master has no same-element branch root.

Rooting is only one part of strength. Visible Resource stems, hidden Resource, seasonal control, Output drains, and Wealth expenditure must also be compared. For this chart, the structural conclusion is a Wood Day Master under Metal seasonal command, with visible Water Resource support and no same-element branch root.

The working strength assessment is weak but supported, not a claim that the person is weak. This is a supported structural reading: different classical schools may weight seasonal regulation and transformation conditions differently, but the underlying season, roots, support, drains, and controls remain calculated facts.

Structural reading

- Supported by season, roots, support, drains, and controls; school weighting may differ.

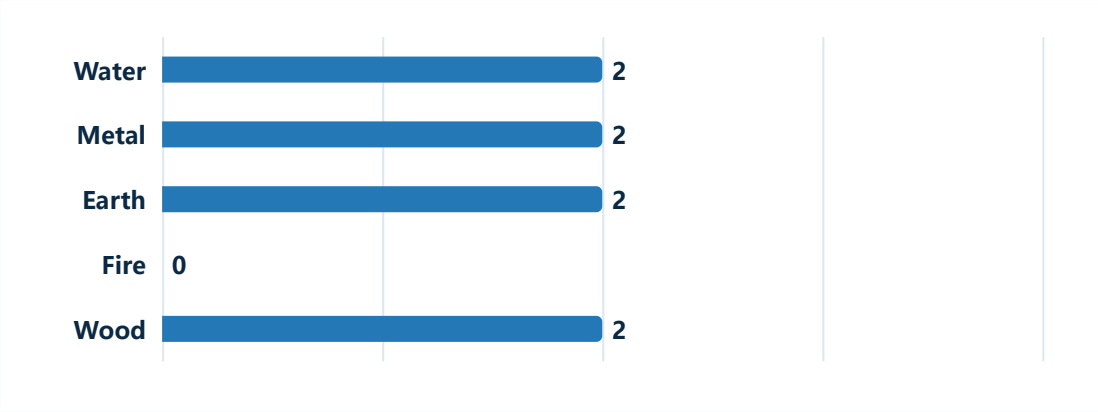

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

03

Structure

Five Elements and Hidden Stems

CORE INTERPRETATION

The visible pillar layer contains Wood 2, Fire 0, Earth 2, Metal 2, Water 2. These counts combine Heavenly Stems with the base element of each Earthly Branch; they are not stem-only counts.

Chart basis

Visible leaders: Wood + Earth + Metal + Water. Hidden-only elements: Fire.

Fire appears only in hidden stems. Every Five-Element category is represented either visibly or in hidden stems. The canonical hidden stems are fixed by branch: Year Branch 戌 contains 戌 Earth (Indirect Wealth), 辛 Metal (Direct Officer), 丁 Fire (Hurting Officer); Month Branch 申 contains 庚 Metal (Seven Killings), 壬 Water (Indirect Resource), 戊 Earth (Indirect Wealth); Day Branch 戌 contains 戌 Earth (Indirect Wealth), 辛 Metal (Direct Officer), 丁 Fire (Hurting Officer); Hour Branch 申 contains 庚 Metal (Seven Killings), 壬 Water (Indirect Resource), 戊 Earth (Indirect Wealth).

A hidden stem is part of the branch structure but is less exposed than a Heavenly Stem. It must not be counted as an additional visible pillar, and it must not be invented from the branch's base element. For this chart, the distinction matters because visible emphasis and hidden support answer different questions.

Visible counts show what is directly present in the four pillars. Hidden stems show the internal composition through which Ten Gods, rooting, and seasonal support are assessed. A hidden stem can contribute to a Ten-God weighting or provide a root without becoming a visible stem.

Conversely, a branch's base element does not erase its internal stems. This chapter records those calculated layers only; strength and useful-element conclusions are made in the following structural chapter.

Calculated fact

- Directly derived from visible elements and canonical hidden stems.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

04

Structure

Ten Gods in the Natal Chart

CORE INTERPRETATION

The Ten Gods are relational labels calculated from the 甲 Day Master; they are not separate deities or personality types. The visible non-Day stems map as follows: year stem 甲: Friend; month stem 壬: Indirect Resource; hour stem 壬: Indirect Resource.

Chart basis Canonical weighted Ten-God leaders: Indirect Resource 41%, Seven Killings 19%, Indirect Wealth 18%. Visible and hidden sources are listed separately.

Branch contributions are calculated from canonical hidden stems with position and hidden-stem weights. The weighted profile is 偏印 (Indirect Resource) 41%, visible and hidden; 七杀 (Seven Killings) 19%, hidden only; 偏财 (Indirect Wealth) 18%, hidden only; 比肩 (Friend) 12%, visible and hidden; 正官 (Direct Officer) 8%, hidden only; 伤官 (Hurting Officer) 2%, hidden only. A percentage shows relative emphasis inside this report's stated weighting method.

It does not mean that a Ten God controls the same percentage of a person's life, and a hidden-only Ten God should not be described as a visible stem. Traditional functions are kept distinct: Companion concerns same-element agency and peers; Output is what the Day Master produces; Wealth is what the Day Master controls; Officer is what controls the Day Master; Resource is what produces the Day Master. Direct and Indirect forms are separated by polarity.

The leading functions provide evidence for later career, wealth, and relationship chapters, but those life-topic interpretations remain contextual. The calculated facts here are each stem mapping, each branch's canonical hidden stems, and the resulting weighted profile.

Calculated profile

- Ten Gods are mapped from the Day Master and weighted visible and hidden stems.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

05

Evidence

Chart Structure, Useful Elements, and Unfavorable Elements

CORE INTERPRETATION

The chart structure is assessed from the Month Branch, Day Master strength, roots, support, drains, controls, and the Ten-God distribution. With a Wood Day Master assessed as weak but supported, the first balancing question is whether Resource and Companion can sustain the Day Master before Output, Wealth, and Officer demands are added.

Chart basis

Useful and unfavorable elements must follow the stated strength and balancing logic; they are not inferred from a simple missing-element count.

Under this strength method, Water Resource and Wood Companion are provisional support candidates. Fire Output is conditional: it can regulate or express the chart in some methods, but it is produced by the Day Master and therefore is not direct support. Earth Wealth requires the Day Master to control it, and Metal Officer controls the Day Master; when the Day Master is weak, additional emphasis in either category requires caution.

Excessive Water is not automatically favorable, because too much Resource can also distort balance. No definitive Yong Shen is asserted. A classical seasonal-regulation method may prioritize a different element from a simple strength-balancing method, and transformation conditions must be verified rather than assumed.

The commercially useful conclusion is therefore narrower: Water and Wood are the leading balancing candidates under the stated method; Fire is a conditional regulator; and Earth or Metal should not be added without checking whether support is sufficient. This is a supported structural interpretation, not a universal school verdict or a promise about favorable events.

Structural reading

- A balancing interpretation; useful-element schools may weigh the same evidence differently.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

06

Evidence

Stems, Branches, and Natal Interactions

CORE INTERPRETATION

Natal interaction analysis compares the supplied pillar stems and branches directly. The calculated contacts are: Stem repeat: 甲-甲 (year and day pillars); Branch repeat: 戌-戌 (year and day pillars); Fu Yin: 甲戌-甲戌 (year and day pillars); Stem repeat: 壬-壬 (month and hour pillars); Branch repeat: 申-申 (month and hour pillars); Fu Yin: 壬申-壬申 (month and hour pillars) Repeated stems and repeated branches are recorded separately from combinations, clashes, harms, breaks, punishments, and meetings.

Chart basis

Only exact supported stem and branch relations are reported; repeats are not treated as two-member combinations.

This chart contains 2 exact whole-pillar repeats, so Fu Yin is present: 甲戌 across year and day; 壬申 across month and hour. Fu Yin here means an exact same Ganzhi pillar occurs in two natal positions. It does not by itself prove a fixed event, biography, or outcome.

These contacts describe how chart components are linked before Luck Pillars or annual years are added. A repeat can concentrate a theme, while a clash or combination describes a different structural relation. Stem repeat, branch repeat, and Fu Yin are therefore listed as separate calculated facts even when they arise from the same pair of pillars.

The calculation does not treat one branch as both members of a pair, does not call ordinary repetition self-punishment, and does not infer an interaction that is absent from the canonical relation list. Interpretation should begin with the exact contacts above and remain secondary to season, Day Master strength, and the Ten-God structure.

Calculated contacts

- Only canonical stem and branch relations found in the supplied natal chart are included.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

07

Evidence

Shen Sha: Secondary Symbolic Stars

CORE INTERPRETATION

Your chart carries two canonical Shen Sha (symbolic stars) derived from the Day Pillar and Year Pillar: 华盖 (Canopy Star) and 驿马 (Travel Horse). The Canopy Star appears in the Year Branch 戌 and Day Branch 戌, sourced from the combination of the Day Pillar and Year Pillar.

Chart basis

Canonical Shen Sha only, grouped by marker and shown with every natal placement on the Shen Sha table.

In traditional BaZi, the Canopy Star is associated with solitude, introspection, and a tendency toward spiritual or philosophical interests. It often indicates a person who values privacy and may feel drawn to study, meditation, or creative work that requires deep focus. The presence of this star in both the Year and Day pillars suggests that these qualities are rooted in your early life environment (Year Pillar) and your core self (Day Pillar).

However, the Canopy Star is a secondary layer and does not override the structural evidence from Ten Gods or elemental balance. The Travel Horse appears in the Month Branch 申 and Hour Branch 申, also derived from the Day Pillar and Year Pillar. The Travel Horse traditionally indicates movement, travel, change of location, or restlessness.

Its presence in both the Month and Hour pillars suggests that career or late-life phases may involve frequent movement or adaptation to new environments. The Month Pillar governs the early to middle adult years, while the Hour Pillar governs later life, so this pattern may manifest across multiple life stages. The repeated Travel Horse in both 申 branches amplifies its potential influence, but it remains a symbolic marker rather than a guarantee of constant travel.

Practical implications include a natural adaptability to change and possible career paths involving transportation, communication, or international work. Confidence in these markers is moderate, as Shen Sha are supplementary and their expression depends on the broader chart structure.

Secondary symbol

- Shen Sha adds context and never overrides the main chart structure.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

08

Application

Career and Suitable Work Environments

CORE INTERPRETATION

Your career tendencies are shaped by the strong presence of Indirect Resource (偏印) in the Month and Hour stems, combined with the Officer and Seven Killings energy from the repeated 申 branches. The Indirect Resource, at 41% of the weighted Ten-God profile, indicates a preference for independent thinking, research, and specialized knowledge.

Chart basis 甲 Wood Day Master, interpreted through Ten Gods, the Day Branch, and relevant natal interactions.

You may excel in fields that require analytical depth, such as academia, technology, law, or strategic consulting. The Resource star supports learning and intellectual development, but its indirect nature suggests you may prefer working behind the scenes or in roles that allow autonomy rather than direct public engagement. The Officer and Seven Killings energy from the hidden stems in 申 (Metal) adds a layer of discipline, structure, and authority.

The Seven Killings (19%) is stronger than the Direct Officer (8%), which can indicate a career path involving challenges, competition, or high-pressure environments. You may thrive in roles that require decisiveness, such as management, military, or entrepreneurship, but the Seven Killings also demands careful self-regulation to avoid burnout. The Wealth stars (Earth) from the 戌 branches provide a material anchor, suggesting that financial stability is achievable through structured effort rather than speculation.

Suitable work environments include those that offer intellectual freedom, clear hierarchies, and opportunities for specialization. Fields like engineering, finance, research, or legal practice align with the Resource-Officer dynamic. The repeated Travel Horse in the branches suggests that your career may involve travel, relocation, or frequent changes in role or location.

Avoid overly rigid or repetitive environments, as the Indirect Resource prefers variety and intellectual challenge. Confidence in these observations is moderate, as career outcomes also depend on Luck Pillar timing and personal choices.

Contextual interpretation

- Career expression depends on education, location, opportunity, and chosen field.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

09

Application

Wealth Pattern and Resource Management

CORE INTERPRETATION

Your Wealth pattern is dominated by Indirect Wealth (偏财) from the Earth branches, with no visible Direct Wealth (正财) in the stems. The weighted Ten-God profile shows Indirect Wealth at 18%, while Direct Wealth is absent from the visible stems and hidden stems.

Chart basis 甲 Wood Day Master, interpreted through Ten Gods, the Day Branch, and relevant natal interactions.

This indicates a financial style that favors flexible, opportunity-driven income rather than a fixed salary or single revenue stream. Indirect Wealth is associated with investments, side businesses, commissions, or entrepreneurial ventures, where returns depend on timing and risk assessment rather than steady accumulation. The Wealth stars are supported by the Resource stars (Water), which produce the Day Master (Wood) and indirectly nourish the Earth Wealth through the generation cycle (Water generates Wood, Wood controls Earth).

However, the Day Master is not rooted in any branch, meaning your personal energy may lack the stamina to consistently pursue Wealth opportunities without external support. The repeated 戌 branches also create a strong Earth presence, which Wood must control. This can lead to a pattern where financial gains require significant effort and strategic planning, as the Wealth energy is abundant but not easily accessible.

Fire's hidden-only presence in the visible stems means there is no direct Output (食神 or 伤官) to generate new Wealth through creativity or expression. This can make the Wealth pattern more conservative, relying on existing resources rather than innovation. Practical implications include a need for careful budgeting and long-term financial planning, as impulsive spending or high-risk investments may not align with the chart's structure.

The Luck Pillar transitions, especially the upcoming 戊辰 (Earth) pillar from age 33, will intensify the Wealth energy, requiring disciplined management. Confidence in this analysis is moderate, as Wealth outcomes are influenced by external factors and personal decisions.

Contextual interpretation

- Wealth symbolism describes structure and operating style, not financial outcomes.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

10

Application

Relationships, Partner Star, and Spouse Palace

CORE INTERPRETATION

In your chart, the partner star for a female is the Officer (正官) or Seven Killings (七杀), which represent the husband or significant partner. The Direct Officer is present only in the hidden stems of the 申 branches (庚 Metal), while the Seven Killings is also hidden in the same branches.

Chart basis 甲 Wood Day Master, interpreted through Ten Gods, the Day Branch, and relevant natal interactions.

The weighted profile shows Seven Killings at 19% and Direct Officer at 8%, indicating that the partner energy is more assertive and challenging than gentle or stabilizing. This can suggest a relationship dynamic where the partner is strong-willed, ambitious, or career-focused, and the relationship may involve power negotiations or periods of separation. The Spouse Palace is the Day Branch 戌 (Earth), which is also the Wealth star.

This placement traditionally indicates that the partner may be practical, materialistic, or involved in finance, real estate, or business. The repeated 戌 branches in the Year and Day pillars suggest that family background and marital life may share similar themes, such as a focus on stability or traditional values. However, the Day Master (Wood) controlling the Spouse Palace (Earth) means you may take an active role in managing the relationship or household finances, rather than being passive.

The absence of a visible Officer stem in the natal chart means the partner star is not directly expressed, which can delay or obscure marriage timing. Relationships may develop through work or social networks rather than romantic spontaneity. The repeated Travel Horse in the branches also suggests that long-distance relationships or frequent moves could be part of your partnership story.

The upcoming 戊辰 Luck Pillar (age 33-42) will bring Earth energy that clashes with the Day Branch 戌, potentially signaling changes in the relationship landscape. Confidence in these observations is moderate, as relationship patterns depend heavily on individual choices and Luck Pillar timing.

Contextual interpretation

- Relationship symbolism is not a verified biography or event prediction.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

11

Application

Health Tendencies Through the Five Elements

CORE INTERPRETATION

Traditional BaZi associates the Five Elements with broad bodily systems: Wood with the liver, gallbladder, tendons, and eyes; Fire with the heart and circulation; Earth with the spleen, stomach, and muscles; Metal with the lungs and skin; and Water with the kidneys and urinary system. These are historical correspondence categories used to describe elemental balance.

Chart basis 甲 Wood Day Master, interpreted through Ten Gods, the Day Branch, and relevant natal interactions.

They are not medical findings and do not identify a symptom, diagnosis, constitution, or future illness. The chart evidence should therefore be read structurally. The Day Master is 甲 Wood.

Elements represented in the pillar stems or branch base elements are Wood, Earth, Metal, Water. Elements found only among hidden stems are Fire, while elements not represented in the supplied chart are none. This distinction matters because a hidden-only element is present but less exposed; it must not be described as completely absent.

In a standard BaZi reading, this section is limited to observing whether elemental functions are concentrated, restrained, supported, or underrepresented in the natal structure and later timing cycles. It does not convert those patterns into claims about the reader's organs, energy level, digestion, sleep, mood, fertility, or disease risk. Luck Pillars and annual years may change which element is emphasized, but they still do not provide a medical forecast.

Use this chapter as a record of traditional Five-Element correspondence only. Personal health decisions should be based on qualified healthcare assessment rather than a BaZi chart.

Traditional correspondence

- Five-Element associations are non-diagnostic and are not medical findings.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

12

Da Yun & Liu
Nian

Luck Pillar Direction and Starting Age

CORE INTERPRETATION

The Luck Pillars (Da Yun) are sequenced reverse. The calculation basis is female birth in a yang-stem year.

Chart basis

Luck direction: Reverse. Basis: Female birth in a Yang-stem year.

This is the standard gender and Year-Stem polarity rule used to choose the order of the ten-year pillars. The supplied starting age is 3. The first Luck Pillar is 辛未, beginning at age 3 in 1997.

The full supplied sequence is 辛未 from age 3 (1997) | 庚午 from age 13 (2007) | 己巳 from age 23 (2017) | 戊辰 from age 33 (2027) | 丁卯 from age 43 (2037) | 丙寅 from age 53 (2047) | 乙丑 from age 63 (2057) | 甲子 from age 73 (2067). These ages and start years are treated as calculated inputs and are not reconstructed in this report. Direction controls sequence only.

Reverse does not mean an inward personality, a backward life, delayed development, or a need to revisit the past; forward does not mean an outward personality or automatic expansion. Likewise, the starting age does not establish maturity, childhood character, or the timing of a life event. It simply anchors the ten-year intervals shown in the timing table.

Ages should be read with their stated start years, especially around a cycle boundary. Interpretation begins only after each calculated Luck Pillar is compared with the natal chart's season, Day Master, Ten Gods, and exact stem-branch contacts.

Calculated timing

- Direction and starting age are supplied by the calculator and are not personality traits.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

THE TIMING ATLAS

Ten-year Luck Pillars and annual contacts

Direction: **Reverse**. Basis: Female birth in a Yang-stem year. Starting age: 3. Each annual contact below names its source in the natal chart or active Luck Pillar.

Nian

Ten-Year Luck Pillars

CORE INTERPRETATION

The calculated ten-year Luck Pillars are read in the supplied reverse sequence. At the report date, the active pillar is 己巳, covering 2017-2026.

Chart basis

Current Luck Pillar: 己巳 (2017-2026); annual contacts are shown with their natal or Luck-Pillar source.

Each pillar is compared with the natal chart; it is not interpreted in isolation. 辛未, ages 3-12 (1997-2006). The Luck-Pillar stem maps to Direct Officer; branch 未 contains 己 Direct Wealth, 丁 Hurting Officer, 乙 Rob Wealth.

Contacts with the natal chart: Six break: 未-戌 (natal year); Three-branch punishment contact: 未-戌 (natal year); Six break: 未-戌 (natal day); Three-branch punishment contact: 未-戌 (natal day). 庚午, ages 13-22 (2007-2016). The Luck-Pillar stem maps to Seven Killings; branch 午 contains 丁 Hurting Officer, 己 Direct Wealth.

Contacts with the natal chart: Stem clash: 庚-甲 (natal year); Stem clash: 庚-甲 (natal day); Half Harmony: 午-午戌, associated with Fire. 己巳, ages 23-32 (2017-2026). The Luck-Pillar stem maps to Direct Wealth; branch 巳 contains 丙 Eating God, 戌 Indirect Wealth, 庚 Seven Killings.

Contacts with the natal chart: Stem combine: 己-甲 (natal year), associated with Earth; Six combine: 巳-申 (natal month), associated with Water; Six break: 巳-申 (natal month); Three-branch punishment contact: 巳-申 (natal month); Stem combine: 己-甲 (natal day), associated with Earth; Six combine: 巳-申 (natal hour), associated with Water; Six break: 巳-申 (natal hour); Three-branch punishment contact: 巳-申 (natal hour). 戊辰, ages 33-42 (2027-2036). The Luck-Pillar stem maps to Indirect Wealth; branch 辰 contains 戊 Indirect Wealth, 乙 Rob Wealth, 癸 Direct Resource.

Contacts with the natal chart: Six clash: 辰-戌 (natal year); Six clash: 辰-戌 (natal day); Half Harmony: 辰-辰申, associated with Water. 丁卯, ages 43-52 (2037-2046). The Luck-Pillar stem maps to Hurting Officer; branch 卯 contains 乙 Rob Wealth.

Contacts with the natal chart: Six combine: 卯-戌 (natal year), associated with Fire; Stem combine: 丁-壬 (natal month), associated with Wood; Six combine: 卯-戌 (natal day), associated with Fire; Stem combine: 丁-壬 (natal hour), associated with Wood. 丙寅, ages 53-62 (2047-2056). The Luck-Pillar stem maps to Eating God; branch 寅 contains 甲 Friend, 丙 Eating God, 戌 Indirect Wealth.

Contacts with the natal chart: Stem clash: 丙-壬 (natal month); Six clash: 寅-申 (natal month); Fan Yin: 丙寅-壬申 (natal month); Three-branch punishment contact: 寅-申 (natal month); Stem clash: 丙-壬 (natal hour); Six clash: 寅-申 (natal hour); Fan Yin: 丙寅-壬申 (natal hour); Three-branch punishment contact: 寅-申 (natal hour); Half Harmony: 寅-寅戌, associated with Fire. 乙丑, ages 63-72 (2057-2066). The Luck-Pillar stem maps to Rob Wealth; branch 丑 contains 己 Direct Wealth, 癸 Direct Resource, 辛 Direct Officer.

Contacts with the natal chart: Three-branch punishment contact: 丑-戌 (natal year); Three-branch punishment contact: 丑-戌 (natal day). 甲子, ages 73-82 (2067-2076). The Luck-Pillar stem maps to Friend; branch 子 contains 癸 Direct Resource.

Contacts with the natal chart: Stem repeat: 甲-甲 (natal year); Stem repeat: 甲-甲 (natal day); Half Harmony: 子-子申, associated with Water. A Luck Pillar changes the timing context but does not replace the natal chart. Its stem adds a visible Ten-God function for the decade, its branch carries a base element and canonical hidden stems, and its exact contacts can repeat, combine, clash, harm, break, punish, or complete a meeting with natal branches.

The list above records those contacts without turning them into guaranteed events. Years near a Luck-Pillar boundary should be checked against the stated start year rather than inferred from age alone.

Structural timing

- Luck Pillars are calculated; their interpretation remains conditional.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

Da Yun & Liu
Nian

Annual Outlook for the Next Five Years

CORE INTERPRETATION

2026 丙午. The annual stem maps to Eating God for the 甲 Day Master, and the active Luck Pillar is 己巳.

Chart basis

Current Luck Pillar: 己巳 (2017-2026); annual contacts are shown with their natal or Luck-Pillar source.

Calculated contacts: Stem clash: 丙-壬 (natal month); Stem clash: 丙-壬 (natal hour); Half Harmony: 午-午戌, associated with Fire. Planning posture: ADVANCE. Move defined work forward, while keeping scope and evidence clear.

2027 丁未. The annual stem maps to Hurting Officer for the 甲 Day Master, and the active Luck Pillar is 戊辰. Calculated contacts: Six break: 未-戌 (natal year); Three-branch punishment contact: 未-戌 (natal year); Stem combine: 丁-壬 (natal month), associated with Wood; Six break: 未-戌 (natal day); Three-branch punishment contact: 未-戌 (natal day); Stem combine: 丁-壬 (natal hour), associated with Wood.

Planning posture: DEFEND. Protect time, liquidity, and decision quality; avoid treating pressure as proof that an irreversible move is required. 2028 戊申.

The annual stem maps to Indirect Wealth for the 甲 Day Master, and the active Luck Pillar is 戊辰. Calculated contacts: Branch repeat: 申-申 (natal month); Branch repeat: 申-申 (natal hour); Stem repeat: 戊-戊 (luck luck); Half Harmony: 申-申辰, associated with Water. Planning posture: ADVANCE.

Move defined work forward, while keeping scope and evidence clear. 2029 己酉. The annual stem maps to Direct Wealth for the 甲 Day Master, and the active Luck Pillar is 戊辰.

Calculated contacts: Stem combine: 己-甲 (natal year), associated with Earth; Six harm: 酉-戌 (natal year); Stem combine: 己-甲 (natal day), associated with Earth; Six harm: 酉-戌 (natal day); Six combine: 酉-辰 (luck luck), associated with Metal; Three Meeting: 酉-酉戌申, associated with Metal. Planning posture: DEFEND. Protect time, liquidity, and decision quality; avoid treating pressure as proof that an irreversible move is required.

2030 庚戌. The annual stem maps to Seven Killings for the 甲 Day Master, and the active Luck Pillar is 戊辰. Calculated contacts: Stem clash: 庚-甲 (natal year); Branch repeat: 戌-戌 (natal year); Stem clash: 庚-甲 (natal day); Branch repeat: 戌-戌 (natal day); Six clash: 戌-辰 (luck luck).

Planning posture: DEFEND. Protect time, liquidity, and decision quality; avoid treating pressure as proof that an irreversible move is required. These labels describe structural timing, not guaranteed events.

A contact can emphasize a topic without proving that a particular career, financial, relationship, or health event will occur.

Structural timing

- Annual contacts are calculated; practical outcomes depend on real-world context.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

Timing Priorities and Practical Summary

CORE INTERPRETATION

The five-year timing sequence is calculated as follows: ADVANCE in 2026, 2028; STEADY in no year in this window; DEFEND in 2027, 2029, 2030. These postures come from the annual Ten God and the exact natal or Luck-Pillar contacts listed in Section 14.

Chart basis

Current Luck Pillar: 己巳 (2017-2026); annual contacts are shown with their natal or Luck-Pillar source.

ADVANCE means a year has supportive output, wealth, combination, or harmony evidence that can justify moving a defined plan forward. STEADY means the chart does not require either acceleration or retreat; maintain pace and review results. DEFEND means clashes, harms, punishments, or other pressure contacts make reversibility and resource protection more important.

None of the three labels predicts success or failure. Use the sequence as a calendar for decision discipline. Compare each year with the active ten-year Luck Pillar, then return to the natal chart's useful-element hypothesis and Ten-God structure.

Real decisions still depend on facts outside the chart, including finances, health, law, relationships, location, and opportunity. The highest-confidence statements are the calculated pillars, dates, Ten-God mappings, and contacts. Structural weighting is supported interpretation, while the planning posture is a contextual synthesis rather than a forecast.

Recheck the timing analysis when the active Luck Pillar or calendar year changes.

Planning synthesis

- A practical summary of preceding evidence, not a guaranteed forecast.

Interpretation boundary

Calculated facts are separated from interpretation. No single symbol is proof of a fixed event.

Calculation basis and reading limits

This report was generated by Tengyunzi's AI interpretation system from calculated chart data. It is not represented as a report written personally by Tengyunzi.

The report follows standard BaZi order: season and Day Master strength first, then Five Elements, Ten Gods, chart structure, life topics, and timing. Interpretation remains conditional rather than a guarantee of events. The recorded birth time of 16:00 is included, so the Hour Pillar is part of the structural analysis.

01

Birth input

Gregorian civil date · Asia/Taipei · birthplace not supplied

02

Chart source

Four Pillars and Luck Pillars supplied by the Tengyunzi calculation engine; solar-time correction is not applied without birthplace data.

03

Ten-God weighting

Visible non-Day stems weight 1.0. Hidden branch stems use 60/30/10 weighting, adjusted by pillar position.

04

Shen Sha scope

Supported canonical markers only. They remain secondary to Day Master, Five Elements, and Ten-God structure.

Important

This report is for educational and reflective purposes. It is not medical, legal, financial, or mental-health advice, and it does not guarantee future events.

REPORT COMPLETE

Chart evidence. Traditional interpretation.

Keep this report with your birth data and revisit the timing sections when the active Luck Pillar or calendar year changes.
